## December Newsletter

### Miracle Berry Tasting

- We had a Med Society x Chem Society collab on November 18<sup>th</sup> with some delicious treats!
- We tasted the miracle berry and experimented to see if whether it actually reduces sourness and enhances sweetness!

### Mentorship Program

- Students met their mentors at the kickoff, and each group is meeting with their mentor this week
- Each person had to come up with research topics prior to meeting
- By January, participants should make progress on their research paper

### Committee Events

- There are no more GA meetings for committees, but there are still bi-weekly meetings for the subcommittee groups!
